 TIER2 Project

Pilots

TIER2 is testing new tools to improve research reproducibility across disciplines through eight active Pilots involving researchers, funders, and publishers. The Pilots are underway and set to conclude by September 2025.

New Reproducibility Networks

Through the creation of the TIER2 Award, we fostered the establishment of three new Reproducibility Networks in Horizon Europe "Widening participation" countries – Georgia, Ukraine and Serbia.

Publications

We've shared over 15 research publications along with numerous event reports and information sheets. Recent publications explore topics including TIER2's contributions to the European Open Science Cloud, reproducibility in machine learning research, virtual laboratories for managing computational experiments, and key barriers and enablers to improving research reproducibility.

Funded by
the European Union

TIER2 receives funding from the European Union's Horizon Europe research and innovation programme under grant agreement No 101094817. Views and opinions expressed are those of the author(s) only and do not necessarily reflect those of the European Union or the European Research Executive Agency (REA). Neither the EU nor REA can be held responsible for them.
